

Purebred Dexter Cattle Association of North America

Registration Criteria

Standard Registration

Animal to be registered must be the offspring of a sire and dam that are registered in the Purebred Dexter Cattle Association registry or other recognized Dexter cattle registry including but limited to: Legacy Dexter Cattle Registry, American Dexter Cattle Association and Canadian Dexter Cattle Association. No genetic testing required if information submitted is undisputed. See PDCA Rules & Regulations.

Certified Registration

In addition to the Standard Registration criteria, a Certified Registration must provide proof by genetic testing or by obligate of the following:
Genotyping
Chondro status (positive or negative)
PHA status (positive or negative)

Other Genetic Information

If submitted, additional genetic testing can be included on/added to an animals registration certificate:
Parent verification
A2 Beta Casein
Color verification
Polled status

Definitions

Breeder – Owner of the dam at time of breeding to produce the animal being registered.

Owner – Legal owner of the dam at time of calving of animal being registered.

Herd Prefix – A breeders unique identifying word, name, initials, variation or abbreviation to be included in the name of all offspring produced by that breeder.

A herd prefix will identify *your* cow named Bessie from *someone else's* cow named Bessie.

Example: Tom & Linda Casey of Lucky Charm Irish Dexter Cattle

Possible Herd Prefix:

TLC Bessie, Casey's Bessie, Lucky Charm Bessie

The herd prefix of breeder (not owner) should be included in the name of animal at time of registration.

Tattoo – A form of permanent identification. Can be tattoo in ear, branding, freeze branding, USDA tag, micro chip, etc. Standard ear tags are not considered permanent.
